Selling Digital Products in the Philippines Research and Business Report

Quick Start Fact Sheet for Nonresident Digital Service Providers

The shortcut I wish I had at the beginning. Create the account first, bookmark the registration page, and keep the current Form 1903 link handy. These are the three official Philippine Bureau of Internal Revenue links that took the most time to locate. Do be patient, the load times for these websites are long and setting up an account is challenging.

1

CREATE YOUR ORUS ACCOUNT

Start with the Bureau of Internal Revenue Online Registration and Update System (ORUS). Choose New Registration and create the account first.

[OPEN THE ORUS REGISTRATION PORTAL](#)

For NRDSP online registration, BIR directs applicants to select Nonresident Foreign Corporation, then Digital Service Provider - NRFC.

2

BOOKMARK THE TRRA REGISTRATION PAGE

This BIR page lists Registration of Non-Resident Digital Service Providers (NRDSP), OFW and Non-Resident Citizens.

[OPEN THE TRRA REGISTRATION PAGE](#)

BIR identifies ORUS as the primary online route. TRRA is the alternative electronic route when ORUS is unavailable or experiencing downtime. The portal identifies RDO No. 39 - South Quezon City for NRDSP matters.

3

KEEP THE CURRENT BIR FORM NO. 1903 LINK

The October 2025 ENCS Application for Registration includes Non-Resident Foreign Corporation - Digital Service Provider as a taxpayer type.

[OPEN OFFICIAL BIR FORM 1903](#)

Page 4 lists documentary requirements for a Nonresident Foreign Corporation, including apostilled official documentation showing the business name and principal office address.

Before you start: Have your official business registration documentation, legal business name, principal office address, organization date, and company email available.
